UI/UX Design

We offer end-to-end User Interface(UI) and User Experience(UX) design services, from initial research and strategy development to final design implementation and testing.

Whether you're launching a new website, web application, mobile app or optimizing an existing platform, we deliver design solutions that enhance user satisfaction and drive business growth.

Wordpress Website

We create custom WordPress solutions that combine powerful functionality with stunning design.

Whether you need a corporate website, e-commerce, or complex web application, we can deliver tailored solutions that engage users, drive conversions, and grow with your business.

Custom Website

From responsive design and seamless user experiences to robust backend systems, we craft custom web solutions built to match your vision. Every detail is designed to align with your brand identity and business goals.

We utilize the latest HTML5, CSS3, PHP, JavaScript frameworks, and modern development stacks to craft responsive, fast-loading, and SEO-optimized web solutions.

E-Commerce Website

We are specialize in creating custom e-commerce solutions designed to boost online sales and elevate user engagement. Our approach focuses on building smooth, intuitive shopping experiences that not only attract customers but keep them coming back.

Whether you need a custom Shopify store, a headless commerce setup, or a fully bespoke e-commerce application, we're here for you.

Web Application

From enterprise platforms to customer facing applications, we can deliver secure, high performance web solutions. Each project is built to drive growth, spark innovation, and give your business a competitive edge in the digital space.

Whether you need internal tools, customer portals, or complex enterprise systems, we deliver solutions that align with your strategic goals.

Android/iOS Apps

We offer end-to-end mobile app development services, from initial concept and design to deployment and ongoing maintenance.

Whether you're launching your first app or scaling an enterprise solution, we deliver mobile experiences that engage users and drive business growth.

Hosting & Servers

We provide fast, reliable, and affordable web hosting solutions tailored to your needs. Whether you're looking for cost effective shared hosting or a more secure, high performance dedicated server, we'll deliver the best option for your business.

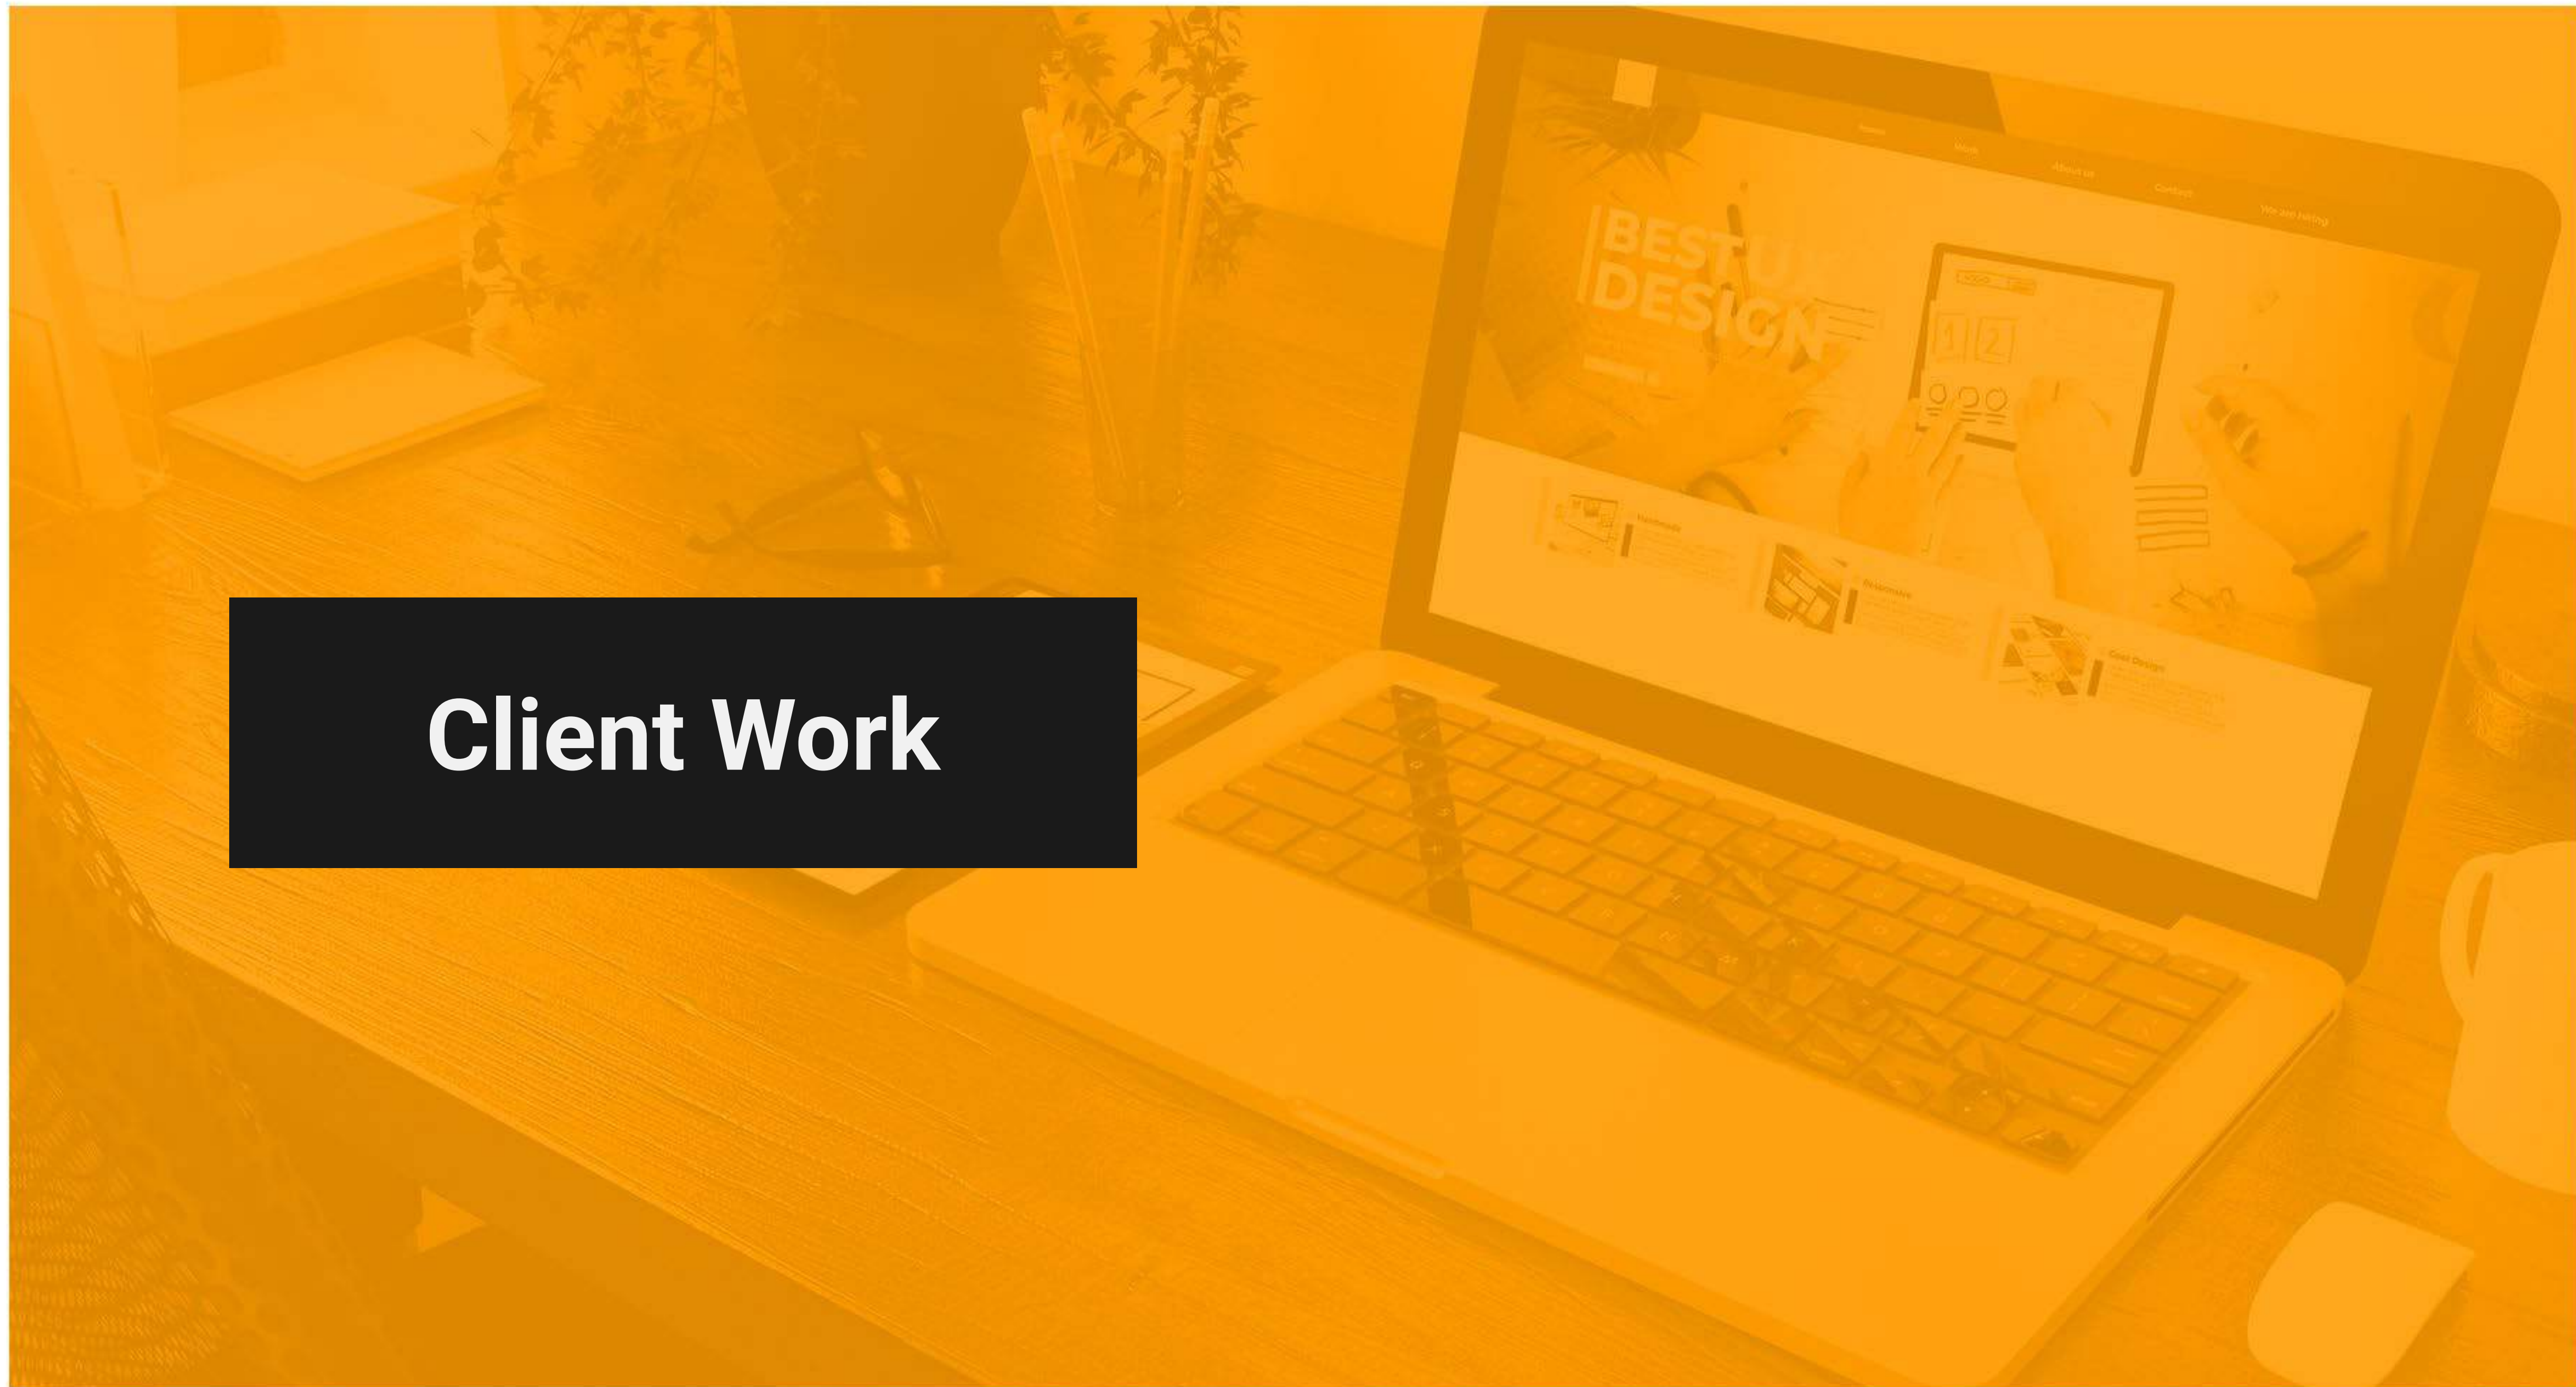

We also offer support with business email setup, email hosting, and domain registration giving you a one-stop solution for all your hosting needs.

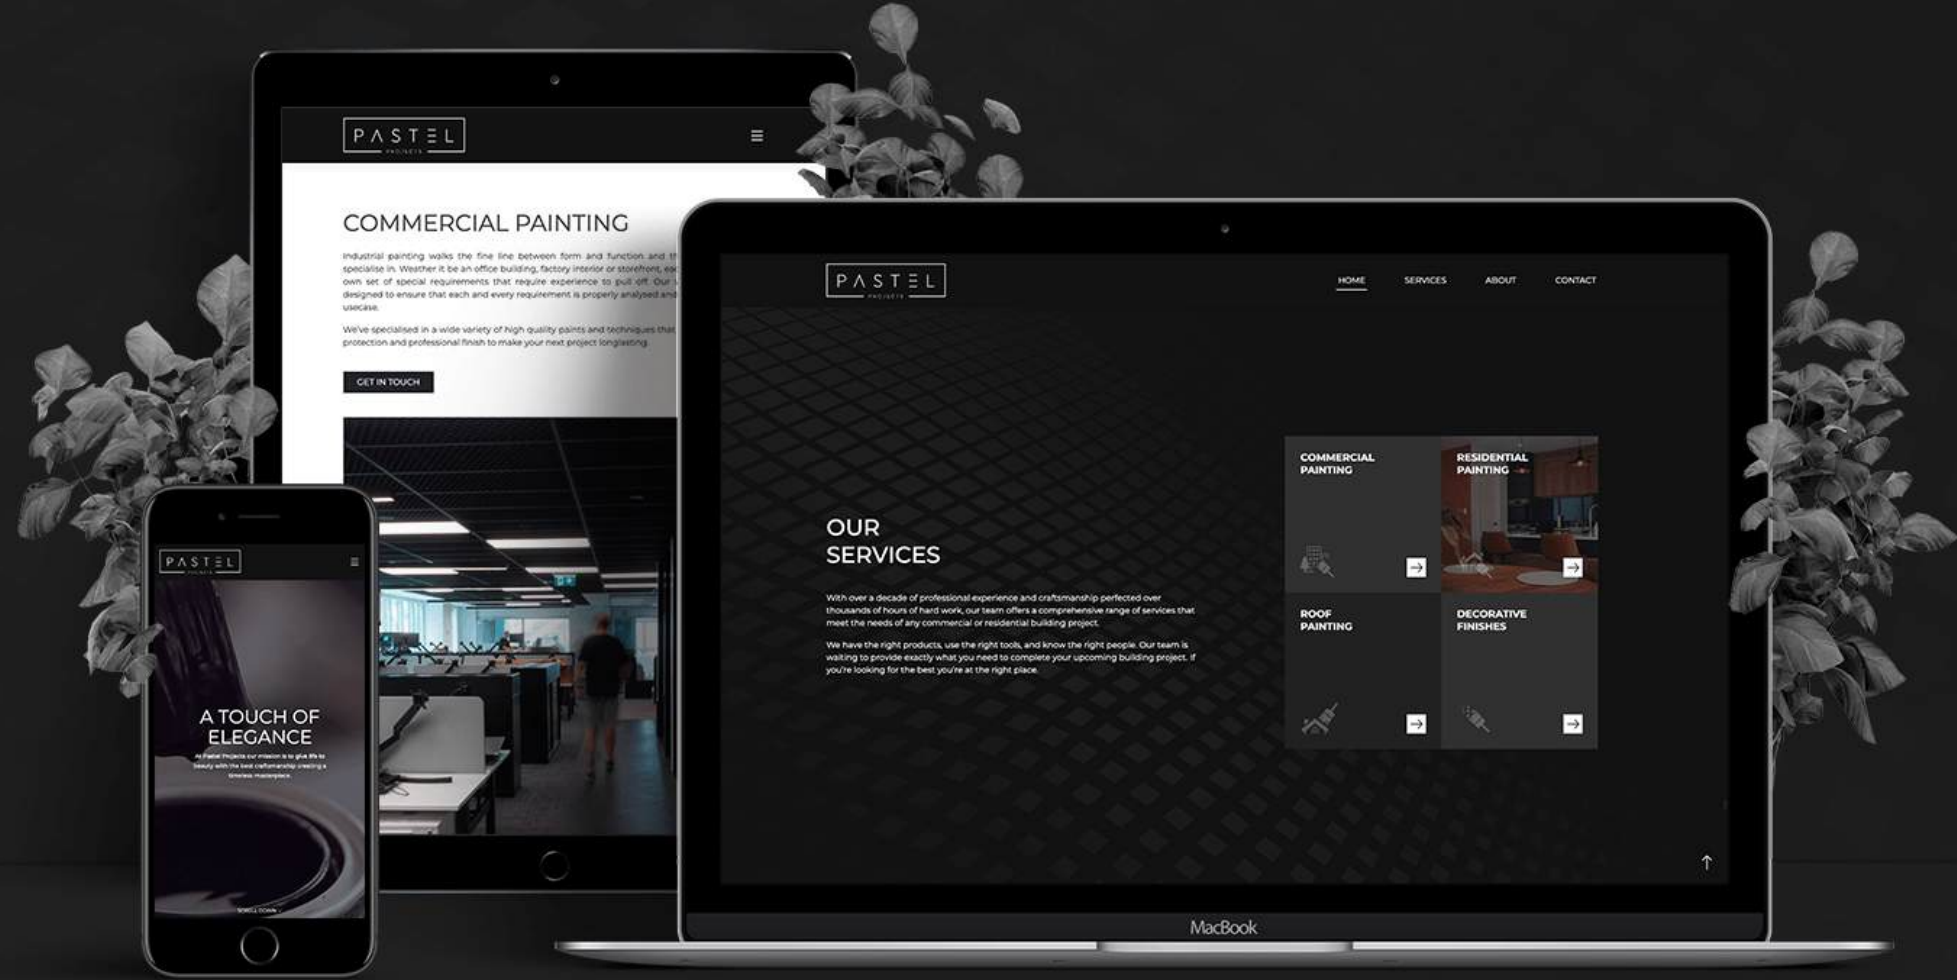

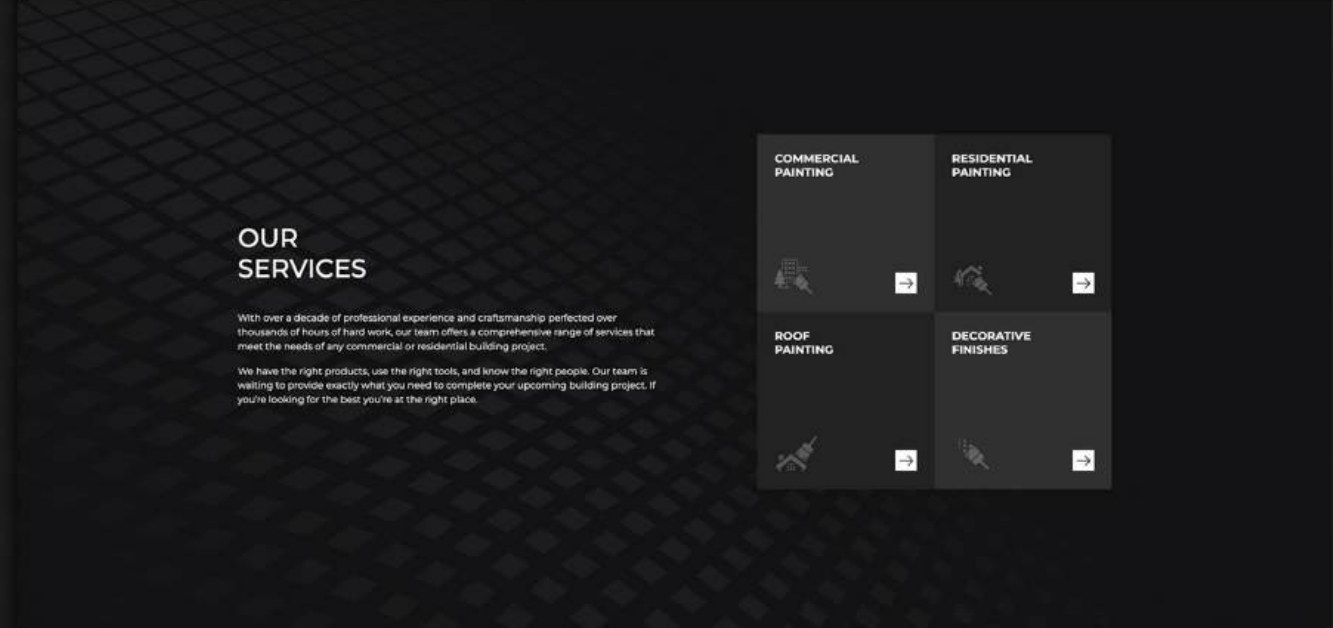

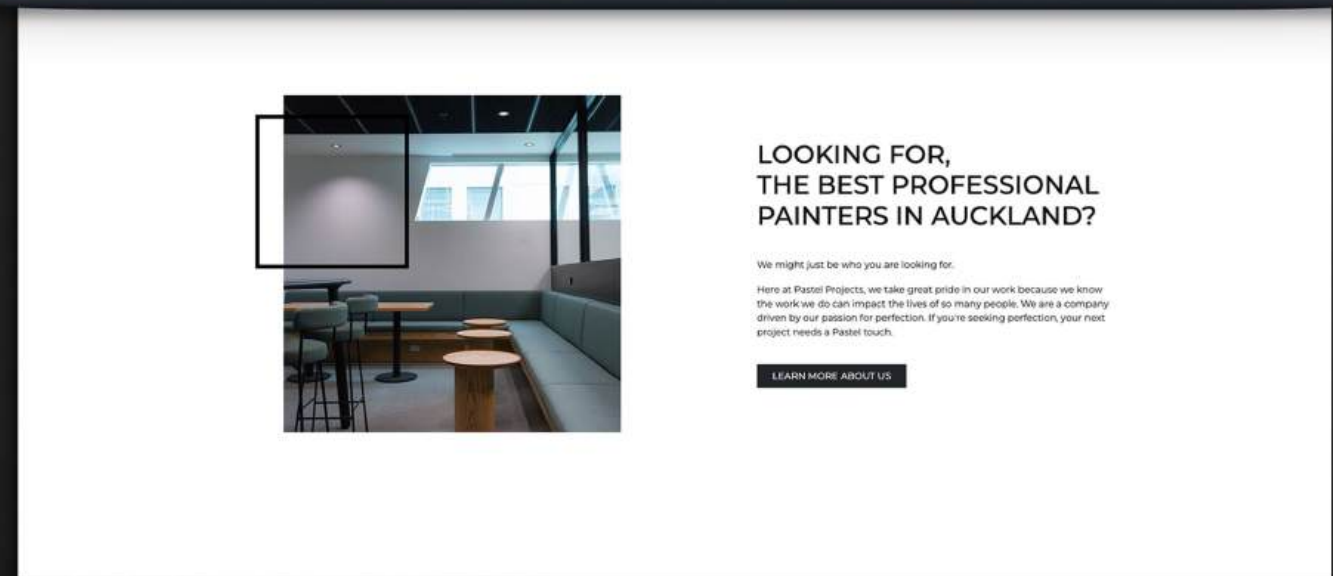

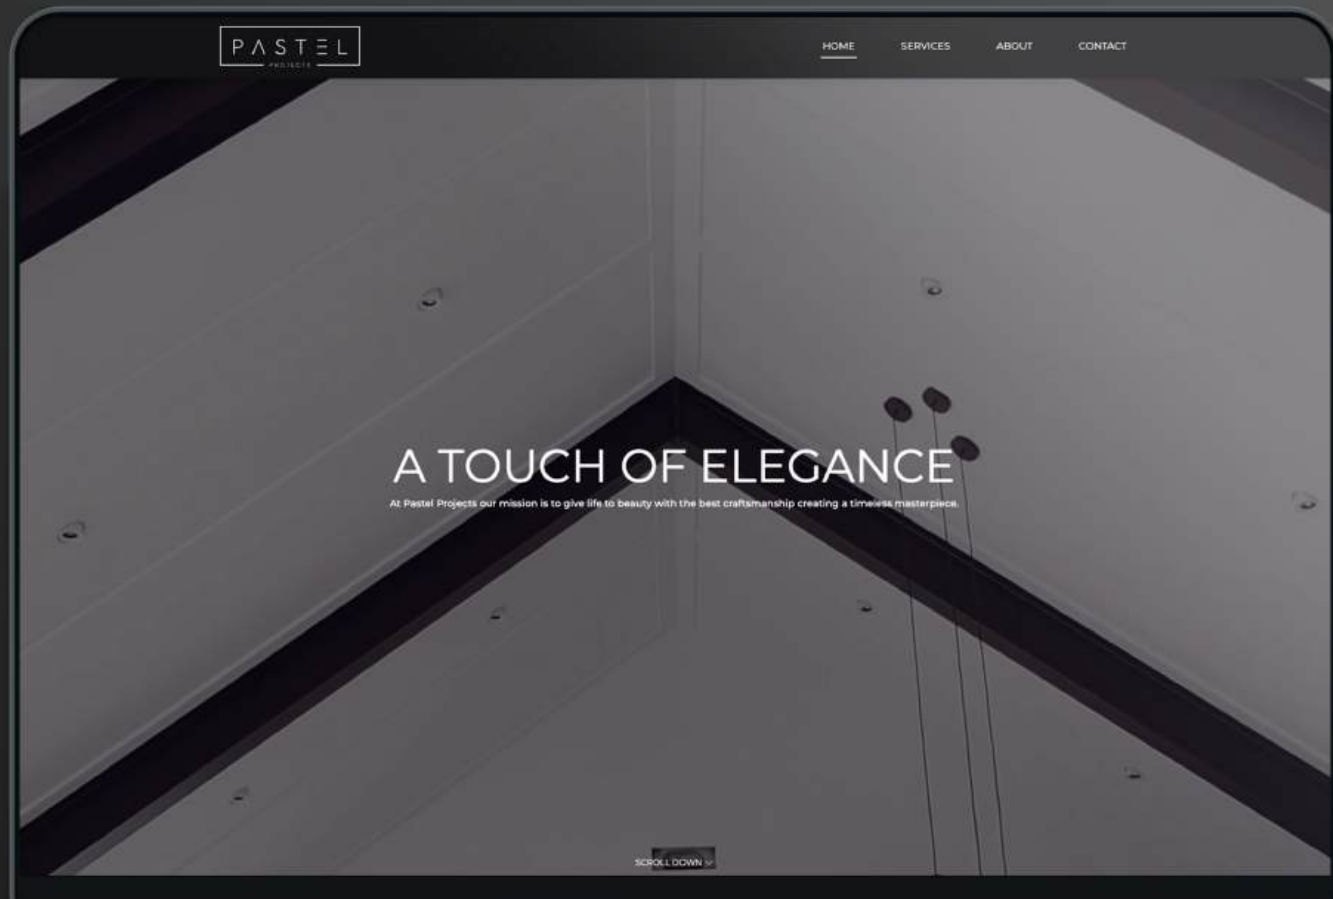

Maintenance & Support

our maintenance experts deliver the ongoing care your website needs to perform consistently and deliver results for your business.

We provide comprehensive care that keeps your site secure and fully functional around the clock. Our proactive approach includes regular security updates, performance monitoring, content management, backup solutions, and technical support.

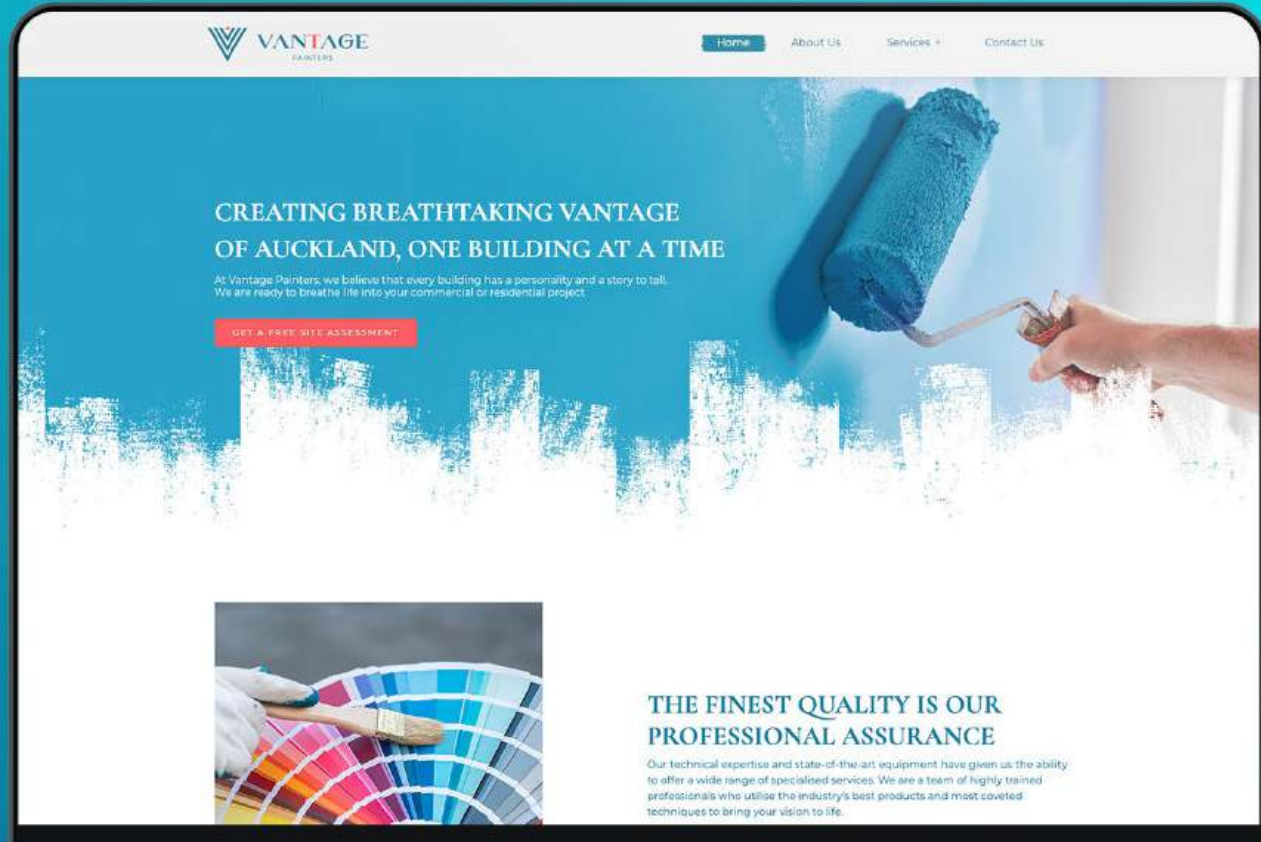

Client Work

Our Services

We offer a range of commercial and residential cleaning services customized to suit your specific requirements.

- Commercial Carpet Cleaning**
Our team of highly trained professionals is ready to deliver the most extensive and cost-effective commercial carpet cleaning service in the Auckland area.
- Residential Carpet Cleaning**
We have over 18 years of experience cleaning commercial carpets and we know the best way to create amazing and long-lasting results.
- Surface Disinfectant**
Our team has been specially trained to meet the current standards of cleaning as our responsibility goes beyond just cleaning.
- Upholstery Cleaning**
We understand that your furniture has special importance to you and we strive to protect its integrity while performing rigorous cleaning.
- Commercial Cleaning**
Our expertly trained team strives to meet the highest standard of service while maintaining safety and environmental standards.
- Hard Surface Cleaning**
An old floor cleaned thoroughly can transform an interior space instantly. Hard surface cleaning is an essential component of building maintenance.
- Warehouse Sweeping**
No matter the size, we at Atmos can guarantee that our team of expertly trained professionals and our state-of-the-art equipment can deliver the highest quality of service.
- Rug Cleaning**
Whether it be your home, office, or place of work, regular rug cleaning plays a big role in benefiting your health and hygiene.

How it works

- Fill and submit our simple online booking form.
- Our team will contact you to confirm your booking and schedule your appointment.
- Our team will visit your location for pre-site analysis or to complete the job on the same day.
- Congratulations! We just joined our list of happy customers.

Happy Customers

The clientele we've acquired through our services is the nucleus of our business. Here are a few reviews from some of our valued customers.

Cillian Bowen
Store Owner

I have been in the business for over 18 years and have never seen such a well-run team. The cleaners came in, assessed the situation and did their job promptly. Our carpets look so much better now, I would recommend them to anyone!

Project Process

You will find our design process is unique, well structured and professional. It is what makes us specialize and always help us to deliver the best to our clients. As the client, you will engaged with us throughout the whole process. So you know what you get, no final surprises. Also, keep in mind that the process will change accordingly to the project brief and the scope.

01

Discovery

The first step is to build a creative design brief to understand and align with you and your needs.

This session will include,

- Discovery call
- Online questionnaire
- Sending the proposal
- Project timeline
- Agreement signing
- Advance payment

02

Research & Strategy

In this phase, we research your business, target audience, and competitors to build a strong foundation for the project.

From our findings, we create mood boards and develop creative strategies and concepts to establish a clear direction for your website design.

03

Concept Making & UI/UX Design

The design process begins with wireframe sketches to map out website's structure and layout. Then move them into a visual UI/UX design.

The design is then presented to you for feedback and revisions to ensure it align perfectly with your vision.

04

Website Development

After the design is finalized, it is handed over to the developer along with all necessary materials to start building the website.

While developer is doing his part, we will collaborate with you to finalize the text and image content, ensuring everything is polished before passing it to the developer.

05

Project Delivery & Support

Once the website is fully developed, then we will do a full site testing to ensure everything work as it should be. Once everything done and we recieved the confirmation from you, we'll make the site ready to launch.

We will also provide after service support and maintenance as per the project contract.

Let's **Talk**

I'd love to hear from you

Feel free to get in touch with me. I am always open to discuss new projects, creative ideas or help on your branding needs. **Just say hello!**
